

hiTee: a golf social network

Created by Emma Troast

Like Facebook or Twitter for golfers? No. hiTee is an app with the sole purpose of getting users off their phones and on the golf course. No distractions, no ads, no popularity contests... just a new way to make the most out of the game we love by meeting new friends and exploring new courses. So what are you waiting for? Go play!

Share memories via pics, videos, and captions. Like and comment on your friend's posts and see what you've been tagged in!

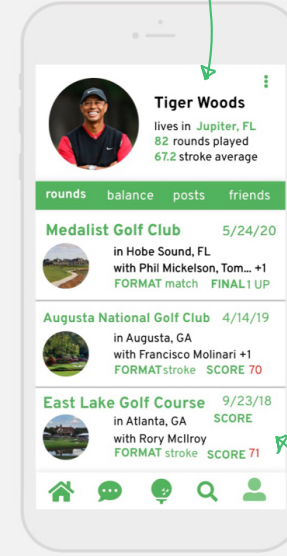

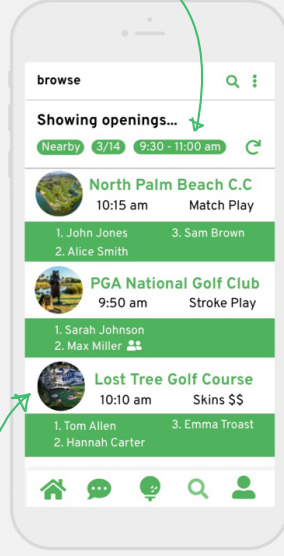

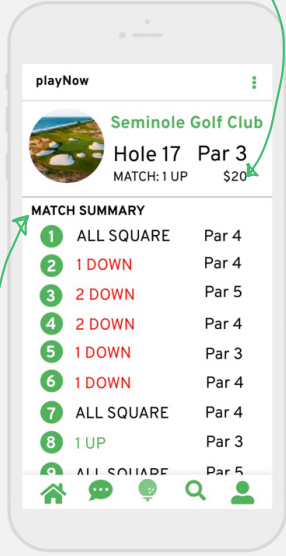

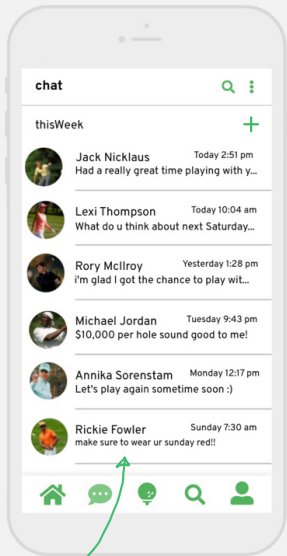

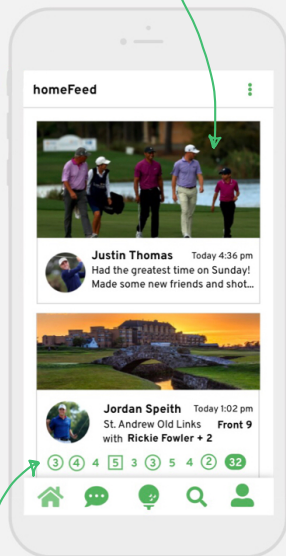

hiTee is dedicated to safely forming real-world relationships through tech. Users are encouraged to meet new friends by using the app responsibly.

Link your Venmo or PayPal account to make some friendly bets. hiTee takes a small portion of these earnings to keep the app thriving.

Users can make tee times in a group or individually. Our app makes the process of making a tee time easier in every way. Pay in advance and hiTee will make a small profit off of each tee time booked through the app.

Filter your search by location, time, player skill, age, golf course and more... the goal of hiTee is to meet new players and feel comfortable doing so.

Your profile page tells other golfers a bit about you! Players can view their past rounds, bets made, old posts and all the friends they have played with! hiTee will keep track of your stats and share your progress.

You can also share your digital scorecard after a round! Add notes and pictures and this data will be saved under your profile, allowing you to look back on past rounds!

The chat feature allows you to keep in touch with players and make future plans. Once you have signed up for a tee time with a user or mutually friended another golfer, the chat function will become available.

During your round, track your scores and get info about the course. Play built-in mini-games to make the game more entertaining for players of all levels! Use our GPS feature and overhead images of each hole on the golf course to improve performance.

View open tee times in your area and see who's playing. hiTee will show your friends and mutual friends, along with the format to be played.

Take a look at your past rounds: where you played, who you played with, and how you have improved!
