

Peace Vision

The What

Often, it seems it is the ones who are the busiest who could reap the most benefits from mental help.

Yet it seems in a society like today, spending time focusing on your mental health is getting more and more taboo. Enter the peace vision.

The Who

- Busy Individuals
- People nervous about traditional therapy
- People looking to refresh their daily lives
- Ultimately... anyone who just wants to feel better!!

The Why

In the world of ever changing technology, therapy has remained the same for decades. Peace vision uses a Human-in-the-loop AI system to combine a therapists knowledge with incredible technology.

How it works

Step 1

Get into bed and get comfy, fully preparing for a great night sleep!

Step 2

Put on your fully charged Peace Vision headphones and sleep mask

Step 3

Once you are asleep you will be connected with a personal Peace Vision certified therapist

THE PRODUCT

WHAT THE THERAPIST SEES

Step 4

Your therapist can now walk through your subconscious thoughts and fears and rationalize whatever is racing through your mind

Step 5

After the one-hour sleep session is complete, sleep will resume as usual and you will wake up in the morning feeling more refreshed and at ease.

Commonly asked questions

Q: How can I trust
my therapist?

A: All of our
therapist go
through a rigorous
review process,
followed by
additional training
to ensure you
receive the best
care

Q: How do they charge

Just like your phone! plug
both products back in after a
great night sleep and enjoy 12
hours of battery life

Can I see my dreams after?

Yes! Every dream vision session is
recorded and uploaded to your profile
for viewing at any time!
